Portfolio

Chalanka-Kodikara

Profile

A Software Engineering graduate with a strong understanding of various aspects of software development. A motivated problem-solver, self-starter, and team player with exceptional technical, analytical, and communication skills. Adaptable and quick to learn, with the ability to grasp complex concepts and emerging technologies efficiently. Passionate about building scalable and efficient software solutions.

Experience

Software Engineer

Talentfort (pvt) LTD 2025 – Present

- Leading the Core HRIS product team to architect, develop, and deploy scalable enterprise HR solutions.
- Spearheaded end-to-end implementation of advanced HRIS modules including payroll, leave management, and attendance synchronization.
- Managed cross-functional collaboration across design, QA, and DevOps teams to ensure product stability and performance.

Associate Software Engineer

Talentfort (pvt) LTD 2024 Feb – 2025 Sep

- Enhanced and optimized web applications using React, Express.js, and MySQL with improved architectural patterns.
- Developed and deployed a secure pro-rata system for 25,000+ members of the Ceylon Bank Employees Union (CBEU), focusing on scalability and data security.
- Applied modern software design principles and implemented layered architecture for better maintainability.
- Used Zoho Projects for project management and Git for version control and collaboration.

Education

BSc (Hons) Software engineering

SLTC Research University 2020 - 2024

- A dedicated software engineer with a strong foundation in software development, problem solving, and system design. Gained hands-on experience in frontend and backend technologies, with a focus on building scalable and efficient applications. Passionate about continuous learning and innovation in the tech industry.

Diploma In ICT

ICBT Campus 2016 - 2017

- Maintain and support IT systems to help organizations and businesses. By completing the International Diploma you will gain the practical knowledge of database management systems, multimedia, software application tasks, hardware fundamentals, and computer programming

Primary and Secondary Education

Mahinda Rajapaksha Collage 2006 - 2019

- A/L Stream - Technology with ICT

Software Engineer Intern

Talentfort (pvt) LTD 2023 Aug – 2024 Feb

- Developed and maintained web applications using React, Express.js, and MySQL.
- Integrated biometric attendance machines with a mobile backend to enhance HRIS functionality.
- Collaborated with cross-functional teams to design scalable and efficient software solutions.

Certificates

Complete Successfully Foundations of User Experience (UX) Design in coursera

Google

2023

Cloud Computing Applications, Part 1: Cloud Systems and Infrastructure In coursera

University of Illinois at Urbana-Champaign 2023

Skills

Tools and & Technologies

- | | |
|----------------|-----------------|
| • JavaScript | • MYSQL |
| • React | • MongoDB |
| • Nodejs | • Figma |
| • Git / GitHub | • Zoho Projects |
| • Python | • Jira |

Personal Skills

- | | |
|-------------------|-------------------|
| • Creativity | • Team Player |
| • Problem solving | • Diligence |
| • Time | • Design thinking |
| • Management | |

Language

- Sinhala
- English

Projects

HRIS System with Attendance Integration

Technologies: React, Express.js, MySQL , Python

- Engineered a Human Resource Information System (HRIS) integrating biometric attendance devices with a mobile backend.
- Developed a robust web platform for HR operations, including payroll, leave, and employee management.
- Implemented efficient synchronization between attendance logs and HR data using Express.js APIs.
- Focused on real-time processing, scalability, and secure employee data management.

ERP System Development

Technologies: React, Express.js, MySQL

- Designed and implemented a comprehensive ERP system covering POS, production, and HR modules.
- Built reusable frontend components using React, and implemented backend logic via Express.js.
- Optimized query efficiency and API response times for large-scale data operations.

Crop Disease Diagnosis System — FYP

Technologies: React, Express.js, MySQL , Python

- Built a machine learning-powered web system to detect crop diseases in rural farming regions.
- Enhanced agricultural productivity by providing real-time crop health insights and reducing losses.
- Improved farmers' access to quality guidance and resources.

Crop Disease Diagnosis System — FYP

Technologies: React, Express.js, MySQL , Python

- Built a machine learning-powered web system to detect crop diseases in rural farming regions.
- Enhanced agricultural productivity by providing real-time crop health insights and reducing losses.
- Improved farmers' access to quality guidance and resources.

Online Super Market System

Technologies: PHP, MySQL | 2021

- Developed an online marketplace to facilitate local product delivery during the Covid-19 pandemic.
- Enabled vendors to list and manage inventory, improving accessibility for regional customers
